

CARBINE PADLOCKS

Carbine is the next generation in locking. Carbine is a high-end brand of locking & hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way. Carbine pushes the boundaries and looks to solve the problems that

have dogged the industry for years. The Carbine Padlocks are a next generation product. Heres why: Carbine padlocks feature a unique patented cam design allowing the user to change padlock function in seconds. The padlocks have been designed by locksmiths using fewer parts and with a smoother action. Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

COMBINATION PADLOCK

Carbine offer a selection of combination padlocks when using a key is not practical. They feature dial wheel configurations and like all Carbine products offer a quality that can be relied upon. Features include:

- Has a changeable 4 wheel dial combination with a possible 10,000 combination changes
- A 51mm body
- Shackle made of molybdenum alloy for high strength
- Has a shackle height of 25mm (CC50) as standard and a 60mm (CC52) model also available
- Has a double ball shackle locking mechanism
- Available with a quick change combination facility for flexibility and convenience with the change key supplied
- Models available with additional weather resistant cover
